Charles,

The attached DoD 4145.26M, DoD Contractor Safety Manual for Ammunition and Explosives I just pulled off the web. As I said, I needed to know just what you are looking for as a particular referenced manual or standard. All the manuals or standards referenced in the contract may not be available on the web. The examples I pulled from the contract at SECTION C: STATEMENT OF WORK FOR THE DEMILITARIZATION AND DISPOSAL OF SEPARATE LOADING PROPELLING CHARGES, below were simply examples of why I needed more description. Ms. Delgado's e-mail below rather generically referenced a contract citation as "compliance with DOD Explosives Handling Procedures" (potentially not in those exact words) and I did not know what she was asking for with that description.

So, if you will let me know what manuals or standards you are interested in, and are unable to acquire off the open web, I will make the effort to get you copies or access to any necessary cites.

Mr. Crosson:

I am in receipt of your e-mail to Ms. Delgado and have some difficulty in finding the references you used and that are used in the contracting documents and the permit issued by the state to Explo Systems. Knowing that there may be multiple references is all well and good, but we need to know where to go to find "DoD 4145.26M, DoD Contractor Safety Manual for Ammunition and Explosives" and "DOD 6055.09-STD, DoD Ammunition and Explosives Safety Standards, Chapter 16" as examples. What you sent to Ms. Delgado doesn't tell us where to find those references.

Would it be possible for you to give me a web site address where these documents may be found? Your assistance is greatly appreciated.

Regards,

Paige,

Where exactly in the contract are you looking. For example, SECTION C: STATEMENT OF WORK FOR THE DEMILITARIZATION AND DISPOSAL OF SEPARATE LOADING PROPELLING CHARGES, includes several references such as the following:

4.1.1 A safety site plan shall be prepared by the contractor. The safety site plan must include operational, storage and receiving structures and sites as stated in DoD 4145.26M.

5.2 The contractor shall comply with the requirements of DoD 4145.26M, DoD Contractor Safety Manual for Ammunition and Explosives as applicable to the contractor planned process and/or operations...

6.2 Scrap and metal components/material which may be released to the general public, will meet the requirements of DOD 6055.09-STD, DoD Ammunition and Explosives Safety Standards, Chapter 16. The contractors ammunition demilitarization and disposal plan, as required by paragraph 4.0 of this SOW, will cover decontamination levels and explosives safety status.

Depending on the context of the portion of the contract you are looking at the manual or standard you seek may be different.

Larry and Brad,

In the contract it cites "compliance with DOD Explosives Handling Procedures" (potentially not in those exact words). Could you provide a copy of those procedures to us or direct me to the appropriate location where I might find them?

Thanks
